

COVID-19 Assessment in HCHB

You will see an assessment in visits for COVID-19 screening. This is a short screening within the physical assessment of your visits. In the assessment, please answer the questions “yes” or “no”. You will be prompted to report your findings as applicable based on your responses. There is also a respiratory screening note in HCHB with the same questions, which is required to be completed on referral/admission and can be completed prior to visits to screen a patient prior to entering the home.
