

The HCHB respiratory screening assessments have been updated with additional symptoms based on the current CDC list of COVID symptoms. As a reminder, if a patient screens positive on this assessment, please utilize your clinical judgement in conjunction with collaboration with the manager or medical provider (physician or APRN) to determine if further action is required.

All clinical staff who use PointCare must refresh their devices to see these updates (even if you have already refreshed today). Please see below CDC list for reference on COVID symptoms:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

The HHG visitor screening tool has been updated with similar information as well.
