

## How to make a conference call on your Android phone

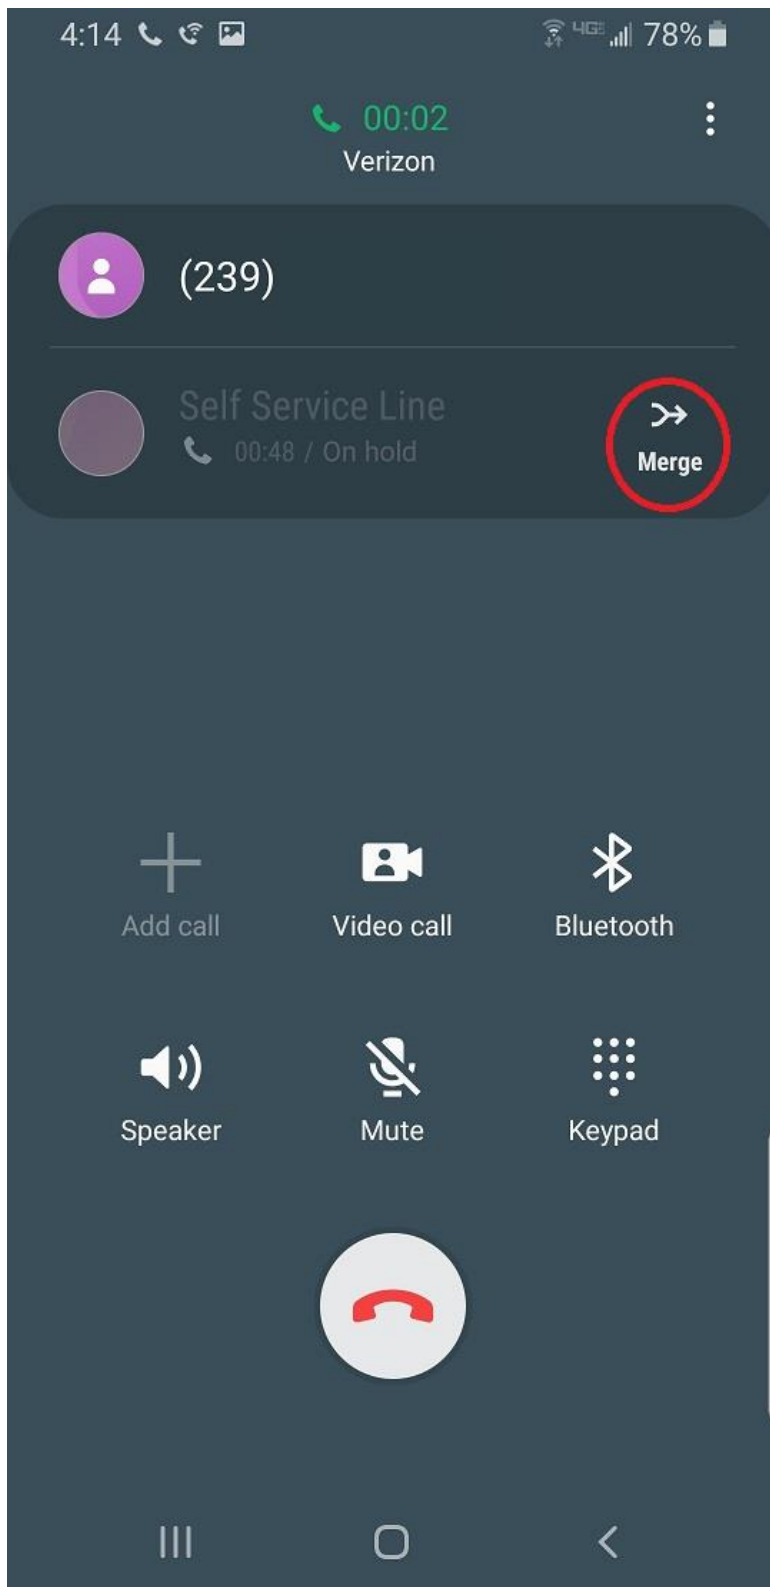

- 1) Dial your first contact. When you are connected with them, tap the “+” sign to add a call.

2) Next, dial your second connection with the keypad, or find the person in your contacts.

3) Once connected with that line, hit "merge".

- 4) You are now on a three-way call. If you want to add more people, repeat the steps again by pressing the “+” sign.
